

Dmitriy Golub

Senior Technical Project Manager

Profile

Full-stack developer with over 15 years of experience helping IT companies build products and services of exceptional quality.

Over the past two years, I led the successful launch of a new B2B product for the digital workflow and automation market as the product's PMO - managing 15 development teams that included 150 people. Developed entirely on microservice distributed architecture, this product features powerful automation Bots and unlimited one-click integration with almost any cloud service or CRM in the enterprise space.
